

THE ONLY SMART IN-FLOOR POOL CLEANING AND CIRCULATION SYSTEM

THE SMARTEST CLEANING TECHNOLOGY
AT THE TOUCH OF A FINGER

INTELLIGENT IN-FLOOR POOL CLEANING AND CIRCULATION SYSTEMS

EASY TO USE, EFFECTIVE, EFFICIENT

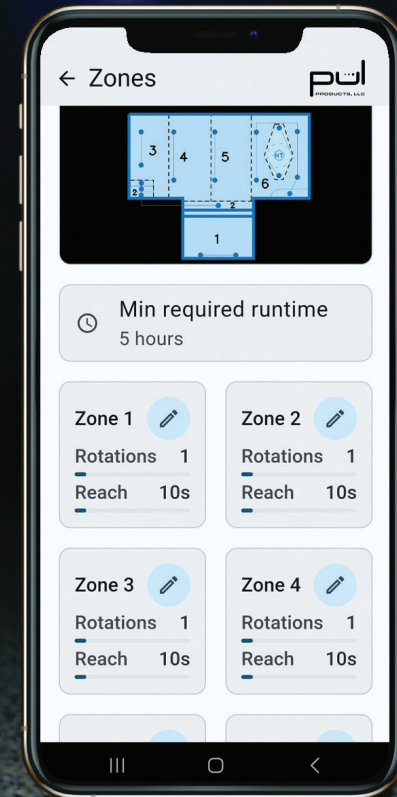

The PUL in-floor cleaning and circulation systems are driven by smart technology for an easy user experience using the proprietary PUL App.

PUL creates a custom cleaning solution for each pool that combines an engineered layout and available cleaning or circulation program with zone-by-zone cleaning to maximize system effectiveness.

In addition to its ease of use and effectiveness, the PUL in-floor cleaning and circulation system produces the highest flow rate at the lowest pump speeds, resulting in the most energy efficient (up to 30%) in-floor system.

FULLY ADJUSTABLE

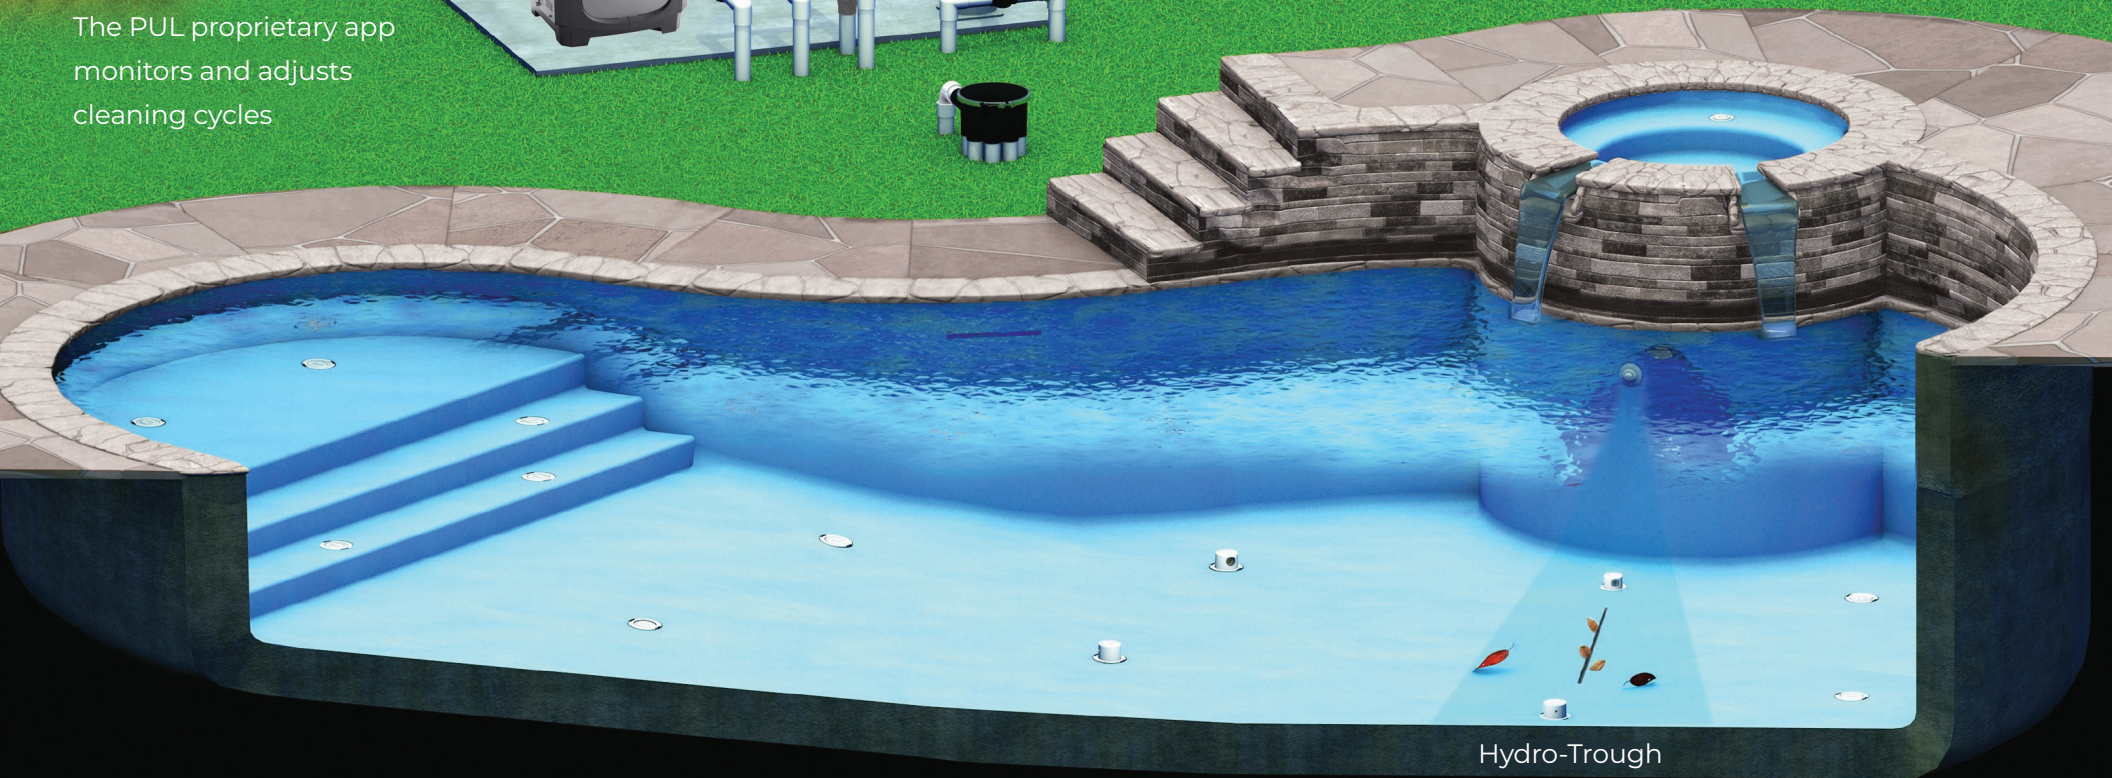

The PUL in-floor systems are engineered and programmed to provide optimal cleaning and circulation performance for your unique pool design. All cleaning functions are fully adjustable through the PUL proprietary app.

AVAILABLE PUL CONEKT PRO ZONE-BY-ZONE CLEANING

The PUL Jets pop up and release a powerful water current to completely remove debris from one zone before continuing to the next. It intelligently moves dirt and debris to the collection zone and into the PUL LD-1 debris removal drain. After the cleaning cycle is complete, the PUL Jets retract and become virtually invisible.

The PUL proprietary app monitors and adjusts cleaning cycles

CIRCULATION WITH A
TRADITIONAL POOL

Traditional pools circulate water near the pool surface resulting in more wasted chemicals and heat lost to the environment

CIRCULATION WITH A
PUL IN-FLOOR SYSTEM

By circulating water through the pool floor PUL can save you up to 30% in chemicals and 40% in heating costs

HYDRO-TROUGH

This PUL Conekt Pro cleaning feature utilizes a combination of PUL Jets and down jets to produce a strategic movement of water around the drain to optimize the collection and removal of dirt and debris.

CLEAN, HEALTHY, AND ENVIRONMENTALLY CONSCIOUS

In-floor cleaning and circulation systems are the only method that completely circulate all areas of your pool, from bottom to top. This circulation of water does more than remove dirt and debris. It also effectively distributes chemicals, eliminates hot and cold spots, and prevents stagnant water that could promote algae growth.

THINK CLEARLY

PUL offers a complete family of in-floor cleaning and circulation systems to meet every pool application and budget.

pulconekt_PRO

The premiere intelligent in-floor cleaning system featuring zone-by-zone cleaning, dual pump flow, and the PUL Hydro-trough collection zone for optimal debris removal.

pulconekt

A fully intelligent in-floor cleaning system featuring zone-by-zone cleaning for superior cleaning action.

pulclean

A robust, easy to install in-floor cleaning system that provides more features than any competitive system, including an 8 port valve, counter rotating cleaning nozzles, and adjustable PUL Jet durations.

pulcirk

The industry's most advanced in-floor circulation system, including a simple single zone operation and adjustable PUL Jet durations.
